

Lifespan Research Study

The Brain Across the Lifespan

The Florida State University Department of Psychology is researching how the brain changes over the lifespan

Participants may earn up to \$540

You may be eligible to participate if you:

- Are between the ages of 36 and 75 years
- Have no non-removable metal in your body
- Are a native English speaker
- Have no neurological diseases or psychiatric disorders
- Are willing to commit up to 8 lab visits over 1-3 months
