

Have you had an infection in the last 6 Months?

MOD00005811
4 October 2025

We are recruiting volunteers to build a blood bank for immunity research at The Florida State University College of Medicine.

The Mousa Lab Blood bank gives FSU researchers access to blood samples and health information they need to answer specific research questions about immunity. Researchers using this blood bank want to learn about antibodies in your blood respond to infectious diseases.

If you're interested
scan the QR code to
take the pre-screening
survey.

Why Participate?

Collecting blood samples from people for one study at a time usually means your sample can only be used to study one disease at a time. Giving to the blood bank can help many scientists find ways to prevent and treat many different infectious diseases with each sample.

Are you Eligible?

- 18-80 years old
- Weigh more than 110 lbs
- HIV and Hepatitis C Negative
- Not Pregnant
- Willing to give a blood sample at our office in Innovation Park

What is involved?

- A blood draw, weight measurement, and brief survey about your health status
- Option to opt for additional draws
- Participants receive \$20 gift card for each sample
