

ARE YOU PREGNANT, PLANNING ON BREASTFEEDING, AND WANT TO LEARN MORE ABOUT VACCINES TO PROTECT YOUR BABY AGAINST RSV?

We are conducting a study to understand the development of immunity in blood and breast milk following maternal vaccination.

Why Participate?

- **Contribute to health research:** Respiratory syncytial virus (RSV) is the leading cause of infant hospitalization and pneumonia in children under one year old.
- **Options for protection:** You will learn more about how to protect your child from RSV

You may be eligible if you are:

- 18 - 45 years old
- Pregnant and in the second trimester of the pregnancy and planning to provide breast milk to your baby
- Willing to participate in four study timepoints for blood and breast milk collections
- Willing to complete electronic surveys

A \$20 gift card will be provided for each blood/breast milk collection.

If interested in participating please scan QR code below to complete the screener.
